This addon designed for Orbiter 2005 Edition, build 050216. Brighton Base addition, freeware.

Luna City

This package contains Luna City - small city in 10 kilometers from lunar base Brighton Beach, see the screenshot.

Installation

Simply unpack archive in Orbiter main directory. Make sure that you use the "Use folder names" in WinZip so all files will be extracted to the proper folder.

Attention! The file `\Config\Brighton.cfg` will be overwritten.

Select any scenario (for example, "Brighton Beach"), place the camera on base Brighton Beach (use **Ctrl+F1**) and will see first town on the Moon - Luna City.
